## NOTICE!

### A PUBLIC MEETING

WILL BE HELD IN

KELLY'S HALL, Stony Plain,

AT 8.30 P.M., ON

**Sat. June 27, 1936**

SUBJECT:—

To Discuss the Opening of a  
Co-operative General Store  
in Stony Plain,

Where You Share in the Profits  
as You Buy.

Public Speakers will be on hand from Edmonton

EVERYBODY WELCOME!

For Information see WM. KELLY.

**Stony Plain's  
Annual Sports Day,  
WEDNESDAY,  
JULY 1st, 1936.**

COMMENCING AT 10 A. M.

Baseball Tournament; 4 Teams.

Girls' Basketball Tournament.

Horseshoe Throwing Contests.

Bing! Bang!! BINGO!!!

Tug-o'-war. Foot Races for all.

Stout Gentleman's Race.

Athletic Sports of All Kinds  
for Young and Old.

First-class Band Music All Day.

### All Aboard for Sports Day!

Arrangements are nearing completion for the celebration of Stony's big day on Wednesday next, according to latest reports.

The Refreshment Committee, with a membership larger than ever, is following closely on the heels laid down last year by that noted caterer, James Christie. All who attend can rest assured that their wants along the refreshment line will be ably attended to.

The Sports Committee, with Mr H Trapp as chairman, has had its duties extended, owing to the request that a larger list of attractions in sporting events be arranged for this year.

The slow car race has been reinstated on the list of events, owing to the requests received from those interested in this line of racing.

A new item on this year's program is a ladies' softball contest, for which \$13.50 has been donated in prize money.

A glance at the list of sports in another column will give one an idea of what has been prepared. It is probable that the custom of other years will be followed—that of adding contests to the list, as requests for these are made, and if time permits.

Spruce Grove is said to be sending up 2 teams as entries in the horseshoe competition. These teams will need watching, as it is remembered that it was a team from the Grove which won the golden horseshoes in a contest at Edmonton Ex. a few years ago.

A temporary fence is being erected on each side of the track, to protect contestants in the races from the crowd.

All in all, if the Weatherman behaves, Stony is to see a bigger and better celebration this year.

### Comet vs. Winterburn.

One of the finest exhibitions of basketball was witnessed at Winterburn Friday, June 19, when Comet was the visiting team in a return game with Winterburn. Comet came thru with a second victory, the score being 11-3. Comet has played many teams, but credit is due both teams for their very fine sportsmanship and clean playing. Basketball fans are hoping to see Winterburn back here in the near future.—A.B.F.

### Duffield Sports Day, July 8.

Duffield's Athletic Club held a meeting in the club room on Saturday last and decided to hold their annual sports day on Saturday, July 8th.

As Duffield's sports day is noted for its full program of athletic events, including horse races, wagon races, baseball and a variety of other sports, there should be a big attendance there on that day.

### Heard on the Bus.

"Hello, Bill! You look kinda funny this morning. What did you shave with?"

"Well, to tell the truth, I shaved with the thing the wife sharpens her lead pencils with."

## Developing Hudson's Bay Route

Recent announcements of efforts that are being made to interest British capital and Federal provincial governments to aid in extending the sphere of influence and service of Churchill as the Canadian port of the Hudson's Bay route by construction of rail extensions to give direct connection between the Bay and the larger centres in the western provinces as well as the Pacific Coast are stimulating public interest in the possibilities of further development of this comparatively new trade channel.

The past few months has seen the birth of proposals that Winnipeg should be given direct connection with Churchill by construction of a road due north from that city which would cut off approximately one-third of the distance between the Bay and Winnipeg via The Pas; that a line should be built from Big River, Saskatchewan through the Lake Athabasca country, giving Prince Albert direct connection with Hudson's Bay and bringing Saskatoon closer; that a link should be made between that line and the Alberta Great Waterways Railway giving Edmonton and Calgary connection with Churchill and also, via Edmonton, a line from Churchill to Vancouver, using the existing C.N.R. main line from the Alberta capital to the B.C. coast port and finally, a suggestion of a more direct line between the Pacific Coast and Churchill through the Peace River country.

It is not likely that all these lines will be built at once, but so many advantages can be claimed for them that it is reasonable to believe extensions will be made from time to time, as the need for them becomes more apparent, and that in course of time, perhaps not so far distant, a more or less direct northern route from Churchill to the Pacific Coast will be an actuality. Just how long that will be is a matter of pure conjecture at this stage.

Some of the advantages claimed for these extensions are that they would make possible the development of the rich mineral lands in the north of the three prairie provinces with greater rapidity, that the shortened distances between Hudson's Bay and the larger western centres would result in decreased freight levies on many incoming and outgoing commodities and that a shorter overland route would tend to promote more tourist traffic between Europe and the Orient. It is also contended that the construction of a direct north route between the Pacific and the Bay would have distinct militaristic value in the event of Canada becoming embroiled with any aggressive Oriental power, since Vancouver would no longer be the sole practical outlet on the western seaboard.

While the military aspect has not been overlooked, the promoters of this new northern network of communications are more particularly interested in the value it would have in developing the trade and commerce of the country, its potential effect on the free exchange of commodities between Western Canada and European countries and particularly Great Britain and its possibility in promoting more local trade.

With the prospective development of the mineralized areas of this vast north country becoming more immediate the last-mentioned objective is one which has immediate significance to the people of the western provinces and should be of particular interest to the farmers who, under existing conditions, are finding an urgent need of developing more and greater local markets for increasing varieties of farm products.

When the immensity of this great northland is reviewed and the undoubted great value of its resources is considered, the possibility of developing local markets for prairie farm products almost stretches the imagination. Because of the nature of the country almost everything required for sustenance of its workers will have to be shipped in and the natural and economically practical source of supply for such commodities is the contiguous agricultural belt.

Then, too, direct railways into the northland will lure tourists from the United States into a country which to them, as well as to the majority of Canadians, is a land of mystery with unparalleled attractions for the lover of the great outdoors and the sportsman. They, too, will have to be fed on what the country affords, and this, it must be remembered is a strictly cash business. Moreover, tourists who can take excursions into such distant territory will not cavil at the few cents additional price they would have to pay, provided they can get the service they demand.

Although its first objective, the construction of a line to Hudson's Bay and of a port and terminal facilities at the northern seaboard has been achieved, the On-to-the-Bay Association does not consider its work completed and it is pleasing to note that the organization is continuing its efforts to make the venture a success in efforts to secure lower freight and marine insurance rates and to foster business via the comparatively new route.

When it is remembered that the Association only came into existence in 1923 its efforts have borne fruit of surprising magnitude in a very short space of time.

A Bactrian piece attributed to 235 B.C. is said to be the oldest coin extant. It was hammered from a crude copper-nickel alloy of Chinese origin.

Why You Should Have It  
1. It's only 1/2 lb.  
2. It's easy to use  
3. It's light  
4. It's a few cents

### Did Not Act The Part

"What did you leave your job at the Goldplated Securities for? I thought you had a good thing there."

"I thought so, too, till I'd been there a week. I was secretary to the vice-president, but he was no vice-president at all. Why, he only took two hours and a half for lunch, and sometimes he'd stick around till four in the afternoon. I couldn't work for a man like that."

### President of Municipalities

Alderman Andrew Simonsen, former Lethbridge member of the legislature, was elected president of the Union of Alberta municipalities at the closing session of the convention at Lethbridge. Edmonton was selected as the convention city for 1927.

Some would rather get in the fellow's way than not be

### World Power Station

Professor Believes Electricity Could Be Produced From Antarctic Gales

Electricity made by Antarctic gales may soon be used to illuminate every home in the world, in the opinion of Prof. Frank Debenham, who was with Captain Scott on his ill-fated expedition and is now director of the Scott Polar Research Institute at Cambridge, England.

Prof. Debenham is confident that the present uninhabited south polar regions, nearly 5,000,000 square miles in extent, will one day house the great power-generating stations of the world.

"All round the continent," he said, "terrible winds blow from the high plateau, and one day these may be harnessed to wind-driven generators. But we should have to wait until we have radio-transmission of power before this inexhaustible source of energy could be connected with the rest of the world."

No human or animal life exists in the Antarctic because, even if they could survive the rigors of the climate, there is no plant life.

To counteract this, however, the professor said building of subterranean cities far below the ice-bound desolation and deadly blizzards of the Antarctic would not be fantastic.

Scientists now visualize the building of great subterranean caverns wherein cities can be erected, with complete scientific civilization, artificial sunlight, and air-conditioning which would put the climate under the control of man.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should give out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach and constipation. Harmful poisons go into the body, and you feel sour.

A more powerful movement doesn't always get at the cause. You need something that works on the liver itself. It is the only way to get the liver to flow freely. To get this bile flowing freely, take two small pills of **Dr. Williams' Pink Pills** to get the liver to flow freely. It is the only way to get the liver to flow freely. To get this bile flowing freely, take two small pills of **Dr. Williams' Pink Pills** to get the liver to flow freely.

### Discover New Drug

Announcement Made By U.S. Department Of Agriculture

Outstanding success during the past year in use of a new drug for the treatment of burns, chronic ulcers and other non-healing wounds was announced by the United States department of agriculture.

Dr. William Robinson, scientist who brought the chemical known as allantoin into wide use after discovering its curative properties, said remarkable results have been obtained by using it to treat the ulcers and surgeons throughout the country.

Speaking cautiously lest the drug might be regarded in the class of alleged cure-alls, Dr. Robinson said results thus far have led the members of the medical profession who have used it to extend the application of allantoin to the treatment of other external wounds which have failed to heal under other treatment. These have included infections of the mouth, diabetic ulcers, and the bone disease known as osteomyelitis.

### Looking Forward To Visit

King Edward VIII. looks forward to meeting on Vimy Ridge many of his former comrades of the Canadian corps, and is glad circumstances will permit him to unveil Canada's national memorial there July 26, according to a message received by Walter S. Woods, Ottawa, vice-chairman of the national Vimy pilgrimage committee.

### To Meet At Vancouver

The 44th annual convention of the National Council of Women will be held in Vancouver next year, the council decided at the closing session of its 1926 convention at Halifax. An invitation for the 1927 convention was extended by both Vancouver and Halifax, but a standing vote of the delegates chose the Pacific coast.

Frost never will occur when there is a wind blowing or when there are heavy clouds near the earth. A clear still night, soon after a rain in the frost season, is most apt to produce a frost.

THERE'S something about cutting your own tobacco right off the plug that makes it taste fresher—and it smokes longer.

### Great Road-Building Project

Tunnel Under Bering Straits Would Link Alaska And Siberia

Back in prehistoric times, it is believed, the Eastern and Western hemispheres were so closely linked that primitive man found it easy to direct his migratory movements from one to the other. If there was not complete union, there was at least a physical condition approximating it.

Now there is talk of restoring that condition by means of a highway that shall reach across the Arctic wastes of the Far North, to Yukon, Alaska, and thence to Siberia by means of a tunnel under Bering Straits. This plan is properly referred to as "the greatest road building project of modern times."

How much of this is an engineering dream and how much of it is based on the hope of profitable returns is not quite clear, although the statement is made that it is being given consideration by financial interests in both the East and the West. The vast mineral and oil wealth of the northland are some of the inducements that make the scheme attractive, it is said. Recent discoveries have revealed that there is a wealth of pitchblende, gold, silver, copper and other mineral deposits in the sub-Arctic regions. The estimated cost is placed at half a billion.

Certainly a project of this nature appeals strongly to the imagination because of adventure, profit and pleasure. It points to the future possibility of motor tours that will truly encompass the world.—Buffalo Courier-Express.

"Your son has a great thirst for knowledge, madam. Where does he get it?"  
"He gets the knowledge from me and the thirst from his father."

### Science And Agriculture

Continued Search For By-Products Benefits Farm And Factory

Presence of undesirable mineral elements in straw has thwarted efforts of science to use it in paper-making and although the handicap may be overcome shortly by scientists, vastness of Canada's wood-pulp reserve will prevent widespread use of straw for paper-making, Dr. Harold Hibbert of McGill University stated in an interview at Edmonton.

Professor of industrial and cellulose chemistry for the pulp and paper research branch at McGill, Dr. Hibbert is leading the scientific movement to find new industrial uses for Canadian farm products. He is an authority on "chemurgy," a coalition of chemical and agricultural sciences.

Our greatest feat to date has been throwing of important new light on composition of plants," Dr. Hibbert explained in speaking of chemurgists. "We are continually searching for new by-products from farm produce and when we find one our discovery is of mutual benefit to farmer and manufacturer."

### Uses Electric Light

Russian Agronomist Grows Vegetables Year Around In Arctic

Vegetables are to be grown all the year around, in the Arctic, according to the agronomist Alexandrov, who claims to have raised lettuce, cabbage and parsley under electric light on Delon Island, in Russia. Preparations have been made for planting cucumbers, tomatoes and eggplant. Dill, cabbage, sprouts and radishes will be raised in hothouses.

Movies in which actors "stand out from the screen and appear in relief have been produced with experimental apparatus.

"There's a Christie Biscuit for every taste"

## Information Given In Respect To Recording Operations On The Farm

Although agricultural accounting has a fairly long history and considerable progress has been made, some problems still remain unsolved and far too little use has been made of accounts by the average farmer. This is the opinion of W. F. Chown, Chartered Accountant, Dominion Agricultural Economics Branch, Ottawa, who discusses some aspects of agricultural accounting in the Canadian Chartered Accountant.

Mr. Chown recognizes the difficulties experienced by farmers in keeping accounts. "In contrast with the conditions obtaining in industry," he says, "consider the case of a farmer called from haying to ship some cattle. If he receives a voucher, probably it will be reduced to pulp in his pocket after several hours in the hay mow. Later he may rush to town to get an emergency order and at his wife's bidding get groceries and buy shoes for the children. The difficulty of remembering these details until office hours will be apparent to any reader who has attempted to keep personal accounts."

Besides such physical difficulties as these in the way of proper accounting, the farmer has many special problems to solve because of the varied nature of his business. Real estate valuation is one of the first he meets. It is commonly happened that the sum of the values of buildings and land is considerably more than the cost or market price of the whole farm. Mr. Chown advises either reducing the value of the separate parts proportionately until together they equal the value of the whole farm, or providing for the contingency of higher replacement costs by systematically building up out of profits a reserve for that purpose.

The rate to be charged for depreciation of machinery varies from farm to farm, according to the amount of service required from any particular implement. Live stock are both appreciating and depreciating assets and call for special accounting treatment. "I have found it quite practicable," says the author, "to treat sales and purchases of live stock as revenue and expense and to inventory live stock at the beginning and ending of the year."

Departmental accounts are necessary on a farm because of the different types of business. Mr. Chown suggests setting up an adjustment account in addition. In this case the department making the transfer is credited with what the produce would realize if sold and the department to which the produce is charged is debited with laid-down cost at the farm. The entries are then completed by debiting and crediting an adjustment account.

"It is quite possible," says Mr. Chown, "that on many mixed farms each enterprise would be conducted at a loss, but the saving on the use of home-grown feeds and manures would be sufficient to turn the losses into a net profit. This alone is sufficient to lead me to believe that the farm can be studied best as a unit in which various combinations of enterprises may be carried on, one of which combinations will be more profitable than the others, rather than as several units under one operator any one of which can be considered independently of the others. Subject to this qualification, departmental accounts are of considerable value. This will not apply where specialization is carried to a high degree and other live stock kept and crops grown to provide power and subsistence for the farm."

The author goes thoroughly into the matter of accounting for farm produce used on the farm, board of hired men, car expenses, help provided by members of the family, etc. One quite practical method of setting up proper accounting systems, where farmers feel that they have not the necessary knowledge and experience, is for several farmers in a district to enter a book-keeping route. These farmers are supplied with account books, instructed in their use and visited

from time to time by a supervising accountant. At the year-end the necessary information for closing is secured by the accountant, the books are assembled and closed and reports are made to individual farmers. These reports analyze his business in comparison with other farms of a similar type on the route.

### Field Crops Of Canada

Gross Farm Revenue In 1935 Was \$43 Million Dollars

Field crops are Canada's main source of agricultural revenue; Ontario and Saskatchewan the leading provinces. The gross farm revenue in 1935 was \$43 million dollars and field crops accounted for about 507 million dollars, more than half of the total.

Saskatchewan is the great wheat province. Despite drought, rust and frost, the yield last year was 138 million bushels, or almost half of the 277 million bushels produced in the whole Dominion. Alberta came second with 102 million, Manitoba had 22½ million and Ontario produced 14 million bushels. The Prairie Provinces produce hard spring wheat, while Ontario produces soft winter wheat. Saskatchewan is also the leading producer of oats. The crop last year was 132 million bushels out of a Dominion total of 394 million. Ontario was second with 85 million bushels of oats and Alberta third with 82 million. Saskatchewan and Manitoba were about equal in barley, with over 23 million bushels each. Ontario was third with 17 million bushels and Alberta fourth with 16 million bushels. Ontario is the principal producer of corn. Saskatchewan grew more than half of the crop.

The potato crop of the Dominion was about 39 million cwt. Quebec was the leading producer with 11½ million cwt., while Ontario was second with 7½ million cwt.

### Community Enterprises

People Of The West Have Not Yet Lost Their Courage

Despite numerous troubles, the people of the West are still filled with courage and ready to maintain a vigorous community life and to press forward with new development if given the least kind of a "break" in an economic way.

Community enterprises are being pushed forward vigorously, various organizations are being well maintained. The smaller towns and villages are showing that they are much alive. In the main, there is nothing much wrong with the great body of people in this Western country despite the hammering of fate and misfortune in the last five or six years.

Someone may say that there is not yet much to be optimistic about in Western Canada. However, the country is made by the people living in it.

A fearful people never made much of an impression in the world; a courageous people can overcome great obstacles. And at any rate, people must live. There has been a lot of pessimism, in which we have not been involved. A little more optimism may give us quite a lift along the way—Regina Leader-Post.

### Artificial Fever As Cure

Artificial fever was advocated by three Colorado physicians as a cure for St. Vitus Dance. Thirteen cases of the nervous malady were given such treatment at the University of Colorado Medical School hospital, with complete recovery in each case they reported in the Journal of the American Medical Association.

### Find Big Gold Nugget

A gold nugget weighing slightly more than five pounds—one of the largest if not the largest ever found in the North Transvaal—was reported to have been found by a young prospector named J. J. Baker. The find was valued at \$25,000. 2154

## Farming Limited In England

So Far North Many Plants Will Only Grow Indoors

There are certain salient things about the geographical position of England, writes J. Sidney Cates, in the Country Gentleman. In the first place, this island kingdom is much farther north than we are prone to remember. Its agriculture is sharply limited by the high latitude. Draw a line west through Central England, and you hit Labrador on this side of the Atlantic.

Although you will see fig trees growing in Central England, the season is too short and too cold for corn to mature. Tomatoes and peaches will ripen only in a glass house where the trapped sun rays give added heat. Travelling over England in late August I were an overcast all the time. At night the temperature was frequently down in the forties, and a fire usually felt mighty good.

English farming is mainly grass farming, with only about one-fifth of the farm land devoted to crops. When you break down the statistical picture of the 48,000,000 acres constituting the United Kingdom of Great Britain and Northern Ireland you get a distribution very, very strange to our agriculture eyes. The arable land, or that used for crops, is only a fraction over 10,000,000 acres. The rest is in grass, and the tendency is for grass to come more and more into its own. The 38,000,000 acres of grass land is further split up into 4,000,000 acres of temporary grass, 18,000,000 acres of permanent grass and 15,300,000 acres of what is termed rough grazing.

### Believes In Using 'Phone

King Edward Has One In Every Room He Goes

More telephones have recently been installed in Buckingham Palace. His Majesty is a firm believer in the use of the telephone, and he has given instructions for a telephone to be placed in every room of the Palace which he may use. The number of telephones at St. James's Palace and Fort Belvedere has also been increased. King Edward VIII, unlike King George V, uses the telephone on all possible occasions—he even puts through calls himself without the operator's assistance. All calls from Buckingham Palace are secret, as special devices prevent the operators from listening in.

### Did Not Include Canada

The St. Thomas Times-Journal says when United States newspapers refer to William Jennings Bryan as the greatest orator America ever produced they must confine America to the United States. Or else they never heard of Sir Wilfrid Laurier, premier of Canada, 1896-1911.

## University Of B. C. Engaged In Work Of Improving The Quality Of Poultry

At the University of British Columbia, under the keen scrutiny of Professor H. A. Lloyd, department of poultry husbandry, 2,500 juvenile representatives of the bluest blood in poultrydom are being weighed, measured and given thorough physical examination every fortnight.

U.B.C. scientists intend to produce a super-chicken which will wrest supremacy of the hen-yard from the present specialized fowl.

They are trying to develop strains of the various standard varieties which will be heavy egg producers and at the same time high-grade meat birds, instead of merely one or the other, as at present.

This change in the policy of the U.B.C. authorities, already famous for development of great egg-producing strains, is due to altered market conditions arising from empire trade treaties and the reciprocity agreement with United States.

These have opened up large markets for poultry meat, exports to Great Britain alone having risen from 600,000 pounds in 1931 to 2,365,528 pounds in 1935, with markets for 10,000,000 available this year if they could be supplied.

But, to capture the markets, Canada must produce a higher-grade bird.

Establishment of Dominion standards and inspection of export shipments has shown that less than 30 per cent of Canadian birds attain the required quality for this trade.

Also, even with the healthy market prevailing, profitable meat production needs flocks that can also contribute a high egg production to the farmer's pocketbook.

It is the intention of U.B.C. poultrymen to produce such poultry.

Already they have had some success. In preliminary investigations they have disproved the accepted theory that a good egg-producing bird cannot be a desirable meat type.

In fact, in most cases, the best U.B.C. layers have proved to be the best shaped, appearing and growing meat birds.

With the initiation of intensive work toward developing the best dual-purpose fowl, this year 2,500 chicks of the best laying stock of University flocks are undergoing inspection for best meat characteristics.

Every two weeks they are weighed and measured and accurate records of the development of each individual are kept, as well as the average performance of each strain.

They are watched for smoother,

plumper bodies, finer bone, quick growth and early maturing.

Tests show that chickens from 200 to 300-egg strains will grade as high as 80 per cent. grade "A", instead of the average 30 per cent. of Canadian poultry.

In addition, strains have been selected whose development is much more rapid than average.

Birds will weigh five to six pounds at 16 weeks of age, and are feathered and otherwise developed at each stage far in advance of the average for the age at which they are examined.

At the same time, egg production is kept at uniformly high levels.

These advanced students from the faculty of agriculture are in charge under Prof. Lloyd.

Barred Rocks and Rhode Island Reds are the chief varieties included in the experiment, though a certain number of White Leghorns are also included.

It is hoped that the work will be far enough advanced next year so that some seed stock of the new dual-purpose strains can be distributed in the province. Large poultry interests have been purchasing U.B.C. stock with the intention of making use of its quicker maturity and larger growth in improving the meat quality of their flocks while retaining a high rate of egg production.

So far, however, none of the special strains have been released. The Dominion department of agriculture is showing considerable interest in the experiments, as they tend to advance the department's plans for increasing Canadian exports of poultry.

U.B.C. poultrymen also believe that, if they can develop a breed which will be suitable for the European market and a high egg producer, the better quality fowl will stimulate Canadian poultry consumption.

### A Senseless Practice

Souvenir Hunters If Caught Should Be Heavily Fined

The experience which befell the Queen Mary in New York is similar to that which befell the crack British liner "Royal Scot" when it visited the Royal City of Progress Exposition at Chicago, some of the worst robbing of the train being done during visits to Canadian cities.

Some people will stop at nothing to obtain souvenirs. They even carried screwdrivers with them in the Queen Mary to take away a little "souvenir" of the ship. The loss is more annoying than serious, as some passenger may grumble over the omission of a little gadget which makes his cabin just short of perfect.

These souvenir hunters should keep their secret to themselves. The real satisfaction of taking away something is to boast about it to friends and exhibit it. If news of this kind should reach the ears of the police there should be prosecutions and sharp fines. It is a silly and senseless practice which should be cracked down upon.

Just imagine if we could not entertain guests in our homes without having to keep an eye on them for taking away "souvenirs" — St. Thomas Times-Journal.

### His Last Place

A very careful woman was engaging a new gardener.

"Have you any references from your last place, my man?" she enquired.

"No, mum, they wouldn't give me one."

"Why?"

"Oh," answered the man, sheepishly, "I bit one of the gardeners."

— as shown in May Income

The building costs compared with May, 1935, according to a statement issued by the Department of Statistics, Ottawa, are as follows:

Costs wanted to be reduced by 10 per cent.

## Crewel-Work in Bright New Pattern

PATTERN 5548

Have you always wanted to do a bit of interesting crewel-work? Here's your chance, and you'll rejoice that this stunning design is so surprisingly easy to do. Some fine wool in a variety of colors, and just simple stitches give pillow or scarf that "very expensive" look. You can use rope silk if you prefer.

In pattern 5548 you will find a transfer pattern of one motif 8½ x 10½ inches, two motifs 11 x 14 inches and two and reverse motifs 2½ x 4½ inches; color suggestions; material requirements; Illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to House of Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## WORLD HAPPENINGS BRIEFLY TOLD

King Gustav of Sweden celebrated his 78th birthday recently.

Run-off from snow raised the level of Great Salt Lake in Utah 20 inches between November 15 and May 1.

The Evesham Psalter, dating back to the 13th century, was sold in London for \$12,000, to go to the British museum.

The ancient office of high constable of Minsk, dating from the 16th century, has been revived in Wales after a lapse of many years.

It took the House of Commons 12 minutes to pass a bill through all final stages to establish a commission to assist finding jobs for returned soldiers.

France's general federation of labor announced its enrollment had reached 2,500,000 members—double the number enrolled before the recent strikes.

At the present rate of increase, 200,000 a year, it is estimated Yugoslavia will have a population of 20,000,000 in 1960. In 1931 the population was 13,934,058.

The tariff board announced it would continue inquiries into the motor car and petroleum industries. In accordance with announcements made in the House of Commons by Hon. C. A. Dunning, finance minister, in the course of debates on budget items.

Work of a Branford veteran, a small ivory casket has been designed for Woodstock veterans to carry to Vimy Ridge on the forthcoming pilgrimage. It will contain ashes from wooden crosses to be burned in a ceremony in Woodstock and these ashes will be scattered on Vimy Ridge.

### Fine For Horn Tooters

By an enactment passed 52 years ago Tillsonburg, Ontario, motorists are still liable to a \$50 fine if they toot their horns in the streets. The bylaw prohibits the blowing of horns in the streets at any hour of the day.

### Photo Of New King

An autographed copy of the photograph of King Edward VIII, believed to be the first delivered in Canada, has been received by the Victoria Rifles of Canada. The photograph will replace the one of King George.

**Don't  
GAMBLE  
with  
MUSTARD!**

The cost of the mustard in any recipe is so small, why take chances by using anything but the best? When you use KEEN'S D.S.F. MUSTARD you KNOW you are getting ALL pure mustard—full of flavour and zest.

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Super-fine grinding brings out the full mustard flavour.

In original tins for as little as 10¢

## Pioneer Bird Bander Active

Jack Miner Bands Over Twelve Hundred Canada Geese This Spring. It is a well-known fact that Jack Miner is a pioneer in tagging birds on this continent. He tagged his first duck in August, 1909, at Kingsville, Ontario. That duck was reported killed in January, 1910, in South Carolina.

He had to invent nets and contrivances to catch the various species he has tagged. That, in itself, was a task that demanded no little ingenuity and entailed no small expense.

To date he has tagged over fifteen thousand Canada geese. This past spring he made seven or eight catches, which totalled over twelve hundred in number.

These tags furnish invaluable information to the scientists, naturalists and game protective departments concerned in the study of the life, habits and migration routes of our birds. The authentic data so secured is used not only in the universities of the continent, but also by federal, state and provincial governments in both Canada and the United States. Such records demonstrate clearly where the largest percentages of migratory wildfowl are killed.

Each tag put on bears Jack Miner's name, post office address and the date, while in one corner is also stamped a selected verse of Scripture, this being Jack Miner's unique way of passing along God's word to the people who shoot this coveted game bird.

Each of the twelve hundred tags put on this spring carried such a Scripture message, so that Jack Miner calls them his "winged missionaries."

## Wheat Control Abandoned

Spain Is First To Part With Europe's Policy On Protecting Wheat Growers

The first important breach in Europe's policy of protecting domestic wheat producers by elaborate governmental methods can be attributed to Spain. The government of that country has given up policies providing for fixed prices, controlled sales and segregation of surplus stocks.

For twenty years the Spanish government has exercised control over the wheat industry in Spain and of late years these measures have had infinite variety. The objective has been to increase returns to producers while maintaining low prices of bread. The only regulation now in force compels mills to keep on hand one month's supply of flour. The government now has on hand about 14,000,000 bushels out of a surplus of about 22,000,000 bushels which was purchased to prevent disruption of the market last year. The government claims that the farmers have extended wheat seeding to unsuitable land, thus bringing about the possibility of a continuous surplus.

Wheat is a basic factor in the wealth of Spain, representing about 25 per cent. of the total value of all agricultural production.—The Budget.

### Thinks Women Too Free

A Duchess who urges domesticity and claims women have carried their crusade for freedom too far was in Toronto recently. The new freedom has done a great deal of good, but now I believe women are too free for their own happiness," Duchess Carafa D'Andria of Naples and New York declared.

### Breakfast Most Important

Everyone should eat an adequate breakfast. If one meal must be omitted, let it be luncheon; but let every man, woman and child eat enough breakfast to take him through the morning. —Daily News

## Plans New Super-Liner

Naval Officer Believes Ship Would Accommodate 10,000 Passengers. Vladimir Yourkevitch, erstwhile Czarist naval officer and designer of the hull of the Normandie, arrived at New York by the French liner Paris. M. Yourkevitch carried plans for a possible new trans-Atlantic liner of 100,000 tons of gross, 25 per cent. greater than the Queen Mary.

Looking across to the adjoining pier, where the Queen Mary lay, M. Yourkevitch pictured his new liner as capable of developing 260,000 horsepower, racing 36 knots, and accommodating 10,000 passengers.

Wrangel Island, Eastern Siberia, has just bought the first motor-cycle ever seen there.

If you want to stay a dictator you must keep the people staying mad at somebody.

## Rescued By Chamberlain

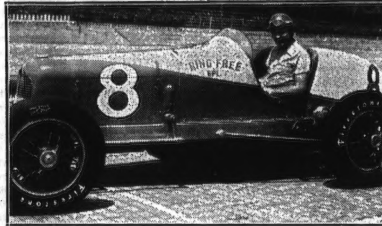

Chancellor Of Exchequer Waded Into Lake After Small Boy

Forgetting his grey top hat and morning coat, Neville Chamberlain, chancellor of the exchequer, waded knee-deep into St. James Park lake to rescue a four-year-old London boy. Chamberlain was walking in the park, within sight of both Buckingham and St. James' palaces when he heard a woman's screams. He hurried a running, strode through the water, grasped the lad and handed him over to his mother. Then, his striped trousers dripping water, he hurried away to nearby 11 Downing street.

An average of more than one person a week is killed on railways in Great Britain.

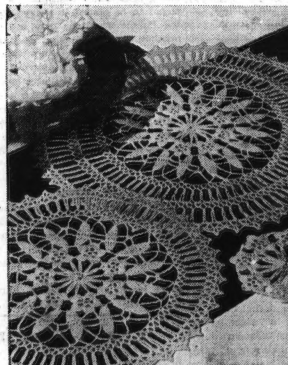

The chestnut blight is the most virulent and destructive disease of forest trees ever recorded.

## LOUIS MEYER MAKES NEW RECORD

Well known to thousands of Western Canadians, Louis Meyer again won the gruelling 500-mile annual race at the Indianapolis Speedway and established a new record of 109.08 miles per hour. Meyer is the only man to have won the race three times. Many readers will remember his having raced in a rubber-tired tractor at the Fall Fairs throughout Western Canada several years ago. In his opinion the new speed records and absence of fatalities in the daring race are largely due to high speed tire developments. With the question of tire safety no longer a factor, Meyer says drivers' confidence and freedom from worry have greatly improved their driving ability and opportunities. Firestone tires were used.

## SUNDAY SCHOOL LESSON

JUNE 28

**JESUS MEETING THE WORLD'S NEEDS**

Golden text: Jesus of Nazareth . . . went about doing good. Acts 10:38. Devotional reading: Acts 1:11.

Jesus Gave a Worthy Ideal. Jesus Meeting the World's Needs is our special review topic. What are the world's needs? Of course the answer is that the world's needs are many, so many that no one can possibly give them all. But they can be classified in such a way as to make our question not an altogether impossible one to answer.

Jesus gave a worthy ideal. This, certainly, is one of the world's greatest needs which Jesus meets. An ideal of life and conduct and spirit which wins the approval of every one when at his best. Others, of course, have attempted to do this, and some have done it with understanding and helpfulness. Even in non-Christian days men were setting up lofty standards and pointing to ideals of life and conduct that were truly noble and good. We owe much to the Platonists and the Aristotles and the hosts of men in ancient and in modern times who have held up pictures of noble living and tried to win men to emulate them. But flaws have been found in the standards that others have set up, while nothing mars the picture which Jesus drew of what we should be and do.

The Sermon on the Mount convicts us and shows us the kind of lives we should try to live.

He Realized His Ideal. He not only painted a picture of what we should be and how we should live and think, but Jesus incarnated that picture in his own life. It is the story of what Jesus was, even more than his picture of what we should be, that wins us. And it is the fact that he was the embodiment of what he taught that fills us with hope; the fact that he, in his human experience, realized the perfect will of God tells us that we can approach unto his perfect life and service. It is a most inspiring fact that Jesus lived the kind of life he did, triumphing in temptation and mastering the hard and trying and tragic tasks given him to do.

He Meets the Need of a Saviour. Whatever may be our theory of the meaning and purpose of the life and death of Jesus, we all unite in one thought that he is the Saviour of the world.

"I know a soul that is steeped in sin. That no man's art can cure; But I know a Name, a precious Name, That can make that soul all pure."

A new upholstery fabric for seats on trucks and buses is reported to stand hard or "even abusive" wear under all climatic conditions.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

## JUDGMENT OF SUPREME COURT ON REFORM LAWS

Ottawa.—The supreme court of Canada found constitutional two of the eight "reform" statutes, referred to it, declared one partly valid, two ultra vires and returned the verdict on three.

The judgments in brief were:

Natural Products Marketing Act—Invalid.

Farmers' Creditors' Arrangement Act—Valid.

Section 498a of the criminal code—Valid.

Dominion Trade and Industries Commission Act—Partly valid.

Employment and Social Insurance Act—Invalid.

Weekly Day of Rest in Industrial Undertakings Act—The verdict.

Minimum Wages Act—The verdict.

Limitation of Hours of Work Act—The verdict.

The Farmers' Creditors' Arrangement Act is a device to scale down farm debts.

Section 498a of the criminal code imposed fines and imprisonment for unethical business practices as recommended by the price spreads commission.

The Employment and Social Insurance Act would have allowed men and women to contribute a portion of their wages and receive weekly doles when they lost their jobs.

The Natural Products Marketing Act enabled groups of producers to set prices and regulate marketing of their products.

Dominion Trade and Industries Commission Act: A statute organizing a commission which would have supervision over business and insist on fair trade practices.

Minimum Wage Act: forty-eight hour week and one day's rest in seven; three acts bunched in one reference to improve labor conditions and were passed under the authority of conventions of the international labor office at Geneva.

The judges split 3-3 on three of the statutes—minimum wages, 48-hour week and a weekly day of rest. Upholding the laws with the exception of one section of the Minimum Wage Act were Chief Justice Duff and Judges Davis and Kerwin. Finding them unconstitutional were Judges Rinfret, Cannon and Crockett.

The judgments of the court will be appealed to the privy council in England, either by the provinces of the Dominion, depending upon the verdict in each case.

The judgment of the court is not binding and does not wipe the unconstitutional laws off the statute books. It is merely an opinion of the court.

The hearing before the court lasted two weeks with the judges taking five months to study the 500,000 words of evidence and the hundreds of legal precedents cited in argument. The hearing was completed just before the opening of parliament.

The provinces claimed the eight laws should be wiped off the statute books because parliament exceeded its powers in passing them. The Dominion upheld them, insisting they were constitutional and within the legal rights of parliament.

The 3-3 split on the three "treaty laws", minimum wages, 48-hour week and weekly day of rest, really will have no effect because it is not binding. It will be appealed to the privy council, probably by joint action of the Dominion and provinces, and its judgment will be final although not binding on any lower court.

Pending the privy council appeal, it is unlikely parliament will do anything to amend the unconstitutional laws, certainly not at this session.

To Await New Session

Ottawa.—Amendments to the British North America Act to provide a method by which Canada may amend its own constitution will have to await another session of parliament, Hon. Ernest Lapointe, minister of justice, told the House of Commons in answer to a question from J. B. Woodsworth, C.C.F. leader.

## Supplementary Estimates

Largest Single Amounts Are For Public Works

Ottawa.—Hon. Charles Dunning, finance minister, tabled supplementary estimates for the year ending March 31, 1937, totalling \$1,265,959, of which the largest single amounts were for public works, and loans and advances to the national harbors boards and harbor commissions. There was a substantial addition to the appropriations for national defence and aviation.

A total of \$2,835,700 additional is to be spent on public works, mainly for buildings in which all the provinces share except British Columbia. One of the largest items in public building appropriations is \$250,000 for a supreme court building in Ottawa, a long-mooted project.

Militia services get an additional \$1,052,436, and the air force, coupled with civil government air operations and civil aviation, \$1,088,115.

Agriculture will get an additional \$1,183,000 of which the largest item is \$750,000 for administration of the health of animals branch, administration of Contagious Diseases Act, and Canned Foods Act. For marketing of agricultural products an additional \$300,000 will be appropriated.

For losses sustained by the British government under the 3,000 British family immigration agreement of 1934, the estimates provide for \$74,866.

An echo of the 1935 riots in Regina arising from the activities of relief camp strikers, appeared in the estimates in the form of an appropriation of \$21,576 for legal fees arising from the inquiry commission which recently completed its work in the Saskatchewan capital.

## Railway Bill Approved

Gives C.N.E. Permission To Build Line In North Quebec

Ottawa.—The house railway committee approved the legislation which gives the Canadian National permission to build a line from Rouyn to Senneterre in northern Quebec, a distance of 90 miles at an estimated cost of \$5,940,000. This will tap a rich mining area east of Noranda.

The measure was not adopted by the committee without strenuous opposition in which N. E. Lariviere, former member of the Quebec legislature for Temiscaming, was permitted to take part. Mr. Lariviere had sponsored in the provincial house the bill which would allow the Canadian Pacific Railway to build a line from Angliers, Que., to Rouyn, and extend it easterly through the mining belt.

However, following an hour and half's discussion, the committee settled all the pros and cons by adopting the bill in toto.

## Big Oil Gusher

Deepest Producing Well In British Empire In Turner Valley

Calgary.—With a roar that could be heard for several miles, a new oil well, the Turner Valley Royalties, declared to be the deepest producing well in the British Empire, came into production recently.

Following the crash of a column of mud and water from the depths more than a mile below the surface, crude oil flowed out in heavy volume. The well is 6,824 feet deep.

Clarence E. Snyder, veteran driller, estimated the flow ran from 700 to 1,500 barrels daily. A flow-controlling device was installed immediately.

## Fragment Of Plane

To Be Presented To Germany By Canada's Olympic Team

Toronto.—A fragment of the plane in which Baron Manfred Von Richthofen, German flying ace, was brought down in France by a Canadian, Roy Brown, will be presented to Germany this summer by Canada's Olympic team. Captain W. R. "Wop" May, Edmonton flyer, whose life was saved when Brown killed the German ace, is donating the fragment. Richthofen was chasing May's crippled ship when Brown came to May's assistance. 2156

## QUEBEC PREMIER

When Premier Taschereau of Quebec resigned after announcing that a new Provincial election would take place in August, the Hon. Joseph Adelard Godbout (above) was named Prime Minister of the Province. Mr. Godbout was Minister of Agriculture in the Taschereau Administration.

## Lower Interest Rates

Premier Bracken Says Government Pledged To Use Efforts To

This End

Winnipeg.—Premier John Bracken's Manitoba government is pledged to every "reasonable effort" in bringing about lower interest rates on borrowings by the province, municipalities and individuals.

In his first public utterance since announcement that provincial elections will be held July 27, Mr. Bracken declared lower interest rates would be sought but he emphasized no threat of either debt repudiation or arbitrary action was implied.

In an address to the Manitoba Municipal Secretary-treasurers' Association, the premier gave some indication of policies the Liberal-Progressive party would present to the electors next month.

He outlined a six-fold "unemployment relief policy" called upon the Dominion to assume a larger share of the cost of social services and referred to problems of agricultural, municipal and drought relief.

## Two Minutes Of Silence

Ottawa.—Members of the government said they would consider the request of the Canadian Corps Association Council to have two minutes of silence decreed throughout the Dominion, July 26, at the moment King Edward VIII. unveiled the Canadian memorial at Vimy Ridge.

## BRITAIN'S NEW COLONIAL SECRETARY TAKES OFFICE

The Right Hon. W. G. A. Ormsby-Gore, formerly First Commissioner of the Colonies, leaving the Colonial Office after his appointment as the new Colonial Secretary of the Colonies in succession to J. H. Thomas, who resigned.

## Hopper Infestation

Mid-Western United States Threatened With Worst Plague Since 1931

Des Moines, Ia.—The worst grasshopper infestation since the "plague" of 1931 and '32 threatens mid-western United States crops, an agricultural survey disclosed.

With newly-hatched "hoppers" already swarming over grain fields in sections of Iowa, Nebraska, Kansas, Oklahoma, Missouri and Montana, spotted infestations were reported also in parts of Illinois, Wisconsin and Colorado.

Recalling the devastation to corn and small grain by the insect hordes four years ago, H. C. Aberg, assistant Iowa secretary of agriculture, asked that state's congressmen to join other mid-western legislators in demanding a \$2,500,000 federal appropriation.

Aberg proposed the funds be used over a two-year period to provide farmers with poison bran mash. It is spread over the fields to kill the pests.

In other infested areas the threat was equally serious. O. S. Bare, University of Nebraska entomologist, predicted Nebraska was in for a disastrous season unless control measures were quickly adopted. He added that "hoppers were reported 'by the millions' over the state."

## Royal Air Force

Plan To Place Organization On A War Basis

London.—Reorganization of the home commands of the Royal Air Force, so as to make the peace organization conform as closely as possible with the organization visualized for war, was announced by the air council.

The new plan, which is consequent upon the expansion of the air force, will comprise three operational commands, namely bomber, fighter and coastal commands, and one training command. The air defence of Great Britain command will disappear and coastal defence will be reorganized.

The air defence of the country will be vested in the three operational commands. Close co-ordination will be exercised between the commands and the air ministry both in peace and war.

## Ask Federal Aid

Ottawa.—Canada's parliament of health, the second annual conference of provincial ministers of health with the Dominion health department, concluded with passage of resolutions asking a great degree of federal assistance in dealing with problems like cancer and tuberculosis.

## ITALY DEMANDS RECOGNITION OF ANNEXATION

Rome.—Italy is not satisfied with mere lifting of sanctions. It also demands recognition of its annexation of Ethiopia.

This, in brief, was the government's stand as outlined to Havas by informed political quarters, who commented on the British cabinet's decision to take the lead in removal of penalties.

London.—The cabinet decided sanctions against Italy must be lifted and approved a pronouncement of new policy dealing, it was reported, both with League of Nations reform and with Germany.

The ministers, convinced continuance of the present measures against Italy would serve no useful purpose, gave authority to the statement which Foreign Secretary Eden will make in the House of Commons. That statement was expected to follow these lines:

Sanctions: Britain is ready to lift them if other members of the league are willing.

The league must be supported but reform is essential.

European peace: A way to settlement must be opened and Germany holds the key to it.

## Many Took Up Insurance

Lloyd's Offered Odds Against Change In Coronation Plans

London.—Lloyd's Insurance Corporation offered odds of 10 to 1 against any change in plans for the coronation of the King next year.

Brokers from the corporation offered these odds to souvenir manufacturers against the chance the King will marry prior to the coronation ceremony or the event will be postponed.

They did a land-office business insuring pottery and other knick-knack makers who are beginning to turn out thousands of coronation souvenirs.

If His Majesty married, for example, the mugs, plaques and other trinkets specially made for the coronation would require two portraits instead of one.

## Will Attend Youth Congress

Thirty Young Canadians Leave In August For Geneva

Ottawa.—Thirty young Canadians are expected to leave on a modern youth crusade to Geneva in mid-August to attend the World Youth Congress opening August 31, according to an announcement from the national office of the League of Nations Society in Canada.

These delegates will represent various groups of young people throughout the Dominion and will be selected by the League of Nations Society from among nominations sent in by interested organizations.

## Gross Revenues Higher

Canadian Railways Show Increase For Three-Month Period

Ottawa.—An increase of more than \$1,600,000 was shown in gross revenues of Canada railways during March compared with March, 1935, according to a report issued by the Dominion bureau of statistics.

Gross revenues \$25,535,156, compared with \$23,967,501 last year. This was the ninth consecutive month to show an increase over the corresponding month of the previous year. For the three months ended March 31 gross revenues increased from \$66,438,165 in 1935 to \$70,366,128 but the operating income decreased from \$2,388,259 to \$2,047,896.

## Tax Collections Higher

Ottawa.—An increase of nearly \$9,000,000 was shown in May income tax collections compared with May, 1935, according to a statement issued by the Department of National Revenue.

The increase was \$8,960,000, or 12.5 per cent, over the corresponding month of the previous year.

## Report of the Annual Meeting of the First Church of Christ, Scientist, Boston, Mass., June 8, 1936.

Boston, Mass., June 8.—An appeal to Christian Scientists to work for the demonstration of World Peace, the reading of reports by church officers on the various activities of the movement throughout the world and sustained demand for the writings of Mary Baker Eddy, Discoverer and Founder of Christian Science, marked the annual meeting today of The Mother Church, the First Church of Christ, Scientist, in Boston, Mass.

Election of Mrs. Elizabeth Cadwell Tomlinson of Boston as President of The Mother Church was announced. She succeeds Dr. Frank C. Cady. Approximately 600 Christian Scientists representing every State in the Union, and practically every civilized nation in the world attended the meeting.

Introducing the theme of World Peace, William P. McKenna for the past year chairman of the Board of Directors, told the audience "There is a rising demand in the hearts of men for freedom and justice."

"Our Leader in her preface to 'Miscellaneous Writings' spoke of 'the spiritual glow and grandeur of a consecrated life wherein dwelleth peace, sacred and sincere in trial or in triumph.' Following her inspiring example, let us dignify this coming year by an endeavor 'to keep the unity of the Spirit in the bond of peace.'" (Ephesians 4:3.)

In her address Mrs. Tomlinson spoke in somewhat the same vein as Mr. McKenna, declaring that "the developments of this hour in world history are not disheartening to the thinker in Christian Science. These developments corroborate and fulfill our Leader's prophecy (Miscellany 28:28): 'War will end when nations are ripe for progress.'"

Edward L. Ripley, re-elected Church Treasurer, expressed gratitude that "There is no debt of any kind on the new Publishing House, and other property owned by The Mother Church or its affiliated trusteeships."

Also re-elected was Ezra W. Palm, Clerk of the Church.

His report included information on the relief work done by the church. The Relief Fund of The Mother Church alleviated distress caused by hurricanes in Florida, by earthquakes in Montana; continued work at the Veterans' Hospital at Oteen, N. C.; aided those whose property was damaged by tornado in Mississippi and North Carolina; and assisted sufferers from floods in southern and eastern states.

His report was dispensed among Christian Scientists and non-Christian Scientists in 14 states. In the course of this work assistance was given to or thru a number of ministers of other denominations who have expressed much appreciation for the assistance and the spirit in which it was administered.

As Manager of Committees on Publication, C. Augustus Nurwood declared that thru the publication of religious items and the rehashing of religious programs and news comments from The Christian Science Monitor, friendly relations have been established with newspapers and radio stations.

Miss Margaret Murney Glenn as Chairman of the Board of Lectureship for the past year cited cases of instantaneous healings which had taken place as a result of public lectures on Christian Science.

The fruition of Christian Science in healing all manner of disease and disorder was attested in selected testimonials read by Mrs. Jennie H. Jarvis.

## Stony Plain and District.

Miss Q Donaldson returned on Sunday to Ottawa.

Mrs F H Rowell, Vancouver, is visiting here with her parents Mr and Mrs Adam Wolfe.

Mill Lake Community are holding a dance in the hall on the evening of next Wednesday, July 1st. Ursel's Melody Four will play.

Get your Edmonton Ex. tickets from Mr. Larson, at the Royal Cafe.

BUTTER AND EGGS WANTED at The Royal Cafe.

## Accorded Graduation Honors

Mr John Biedewieden, son of Mrs E Eberhart, was among those who received their diplomas at the Convocation services at Concordia College, in Edmonton, on Friday last.

Rev A J. Mueller, of St Peter's church, delivered the Convocation address. Principal Schwerman spoke on college activities of the past session.

## A Record.

Another record has been announced — this time the honors go to Mr Geo. Miller of Glory Hills. Statistics show that this worthy gentleman has been made 3 times a grandfather in the 30 days ending Monday last. Following are the items:

To Mrs P G Miller, a son.  
To Mrs Draves, Keep Hills, a daughter.

To Mrs Freitag, Heatherdown, a daughter.

## Road to a School.

A delegation from Inga M D, went north on Monday, to arrange for the opening of a road leading to the Lakemere school from the north, in Tp 53, Rg. 1-w5th.

The delegation consisted of Councillors Staub, McKinlay, Estock, and was headed by Reeve Howat. The survey showed that a road built on the original survey "cuttings" was out of the question owing to numerous hills and lakes encountered.

When work on the project is commenced it is probable the road will follow the shores of the larger lakes on the route.

## Obituary.

Caroline Dedick, relict of Jos D-dick, of Golden Spike, passed away on Friday, June 19, aged 69 years.

The funeral was held Sunday afternoon, a service being held in St John's Lutheran church, Golden Spike. Rev P Hanneman officiated. Interment was made in the Golden Spike cemetery.

She is survived by 3 daughters, Mrs H Thelman, Bradwell, Sask; Mrs H Werle of Golden Spike; 3 sons, P W Trautman, John Dedick, Wm Dedick.

Otto Ritter passed away at Golden Spike on June 22, aged 59 years. He is survived by his wife, 3 daughters, Mrs Martin Goebel of Spruce (2 sons), Misses Alina and Martha; 4 sons, Fred, Dan, Henry, Martin.

The funeral service was held on Wednesday at St John's Church, Golden Spike. Rev P Hanneman, the pastor, officiated.

## The Silvio Gesell Scrip.

There'll be world-wide interest in the experiment Alberta is to make in the Silvio Gesell system of issuing scrip which must be stamped monthly, says a writer in The Edmonton Bulletin.

It was the Silvio Gesell system which worked the "Miracle of Schwanekirchen" in Bavaria. A mining engineer took over a flooded mine and paid the men with scrip. As the village shopkeepers feared the new money, he opened a company store where the scrip could be redeemed. Finding their trade gone and the colliery store prospering, the village storekeepers soon petitioned to take the scrip.

The reduction in value of the scrip each month — necessitating the affixing of a stamp to maintain its face value — makes each holder anxious to pay his bills. The Schwanekirchen experiment speeded the liquidation of debts, secured prompt settlement of accounts and stimulated buying. It promised to spread over Germany. The Reichsbank in alarm induced the government to prohibit the Gesell system.

In Schwanekirchen the stamp rate was 1 p per month. In 100 months the bills retired themselves.

Accepting and passing the proposed Aberhart stamped scrip for purposes of money may prove an expensive matter to Alberta citizens, for they will be liable to fines to the tune of \$400 every time they do it, according to Edmonton Journal. The Canada Bank Act says so. However fast scrip may circulate, it breaks the law.

Opinion of several experienced barristers in Edmonton, being sought in interpretation of the Act, was that stamped scrip is "an evasive form of currency," designed to pass as a "substitute for money," and that under the terms of the Dominion act anyone who attempts to reissue it is guilty of a criminal offence and liable to penalty.

The specific clause of the Bank Act, sec 138, reads as follows:

"Every person, except a bank, to which this Act applies, who issues, reissues, makes, or draws, or endorses any bill, bond, note, checks or other instrument intended to circulate as money, or to be used as a substitute for money, for any amount whatsoever, shall incur a penalty of \$400."

## Bruce Battalion Reunion.

The 100th Bruce Battalion will hold a reunion and old home week in Wiarton June 29, 30, July 1. A good program of sports is planned, sea flea races, water sports, softball, football, horse shoe pitching, big Midway, thrilling circus acts, clown band, pipe band, something doing all the time.

## Sporting Notes.

—BY H. C. O.—

Baseball draw for July First is as follows—

10 a.m.—Spruce Grove v. Stony Plain

12 noon—Brightbank v. Mayerthorpe

2 p.m.—N. Edmonton vs. Sanguo.

Winner of the 12 draw gets the bye.

In basketball the draw has not been made yet, but Spruce Grove, Winterburn, Comet, Brightbank, Stony Plain are sure starters, and a 6th team is being considered.

No word has been received as to the competing softball teams.

Stony Seniors got a bad jolt here last Friday, when the North Edmonton gang took a League fixture, 3-1. Edmonton played sports ball from start to finish and had the locals handcuffed thru-out.

However some of the sting was taken out Sunday, when Stony journeyed to Fort Saskatchewan and won 5-1. Albert Ducholke received a spike in the knee, which will keep him out for awhile.

Word has been received that Eddie Enders is pitching for Westminister Salmon Bellies in B. C. We wonder if Eddie has relieved the ache from their name?

## LEAGUE STANDING.

|             | Won. | Lost. | P.C. |
|-------------|------|-------|------|
| Gibson      | 5    | 1     | .833 |
| Fort Sask   | 4    | 3     | .572 |
| Stony Plain | 3    | 5     | .375 |
| N. Edmonton | 3    | 6     | .333 |

STONY PLAIN'S BIG SPORTS DAY, WED., JULY THE FIRST!

## Spruce Grove News.

Mr Wangler Sr. left on Sunday morning's train for Vancouver. He is taking the trip to the Coast on the advice of his physician, and he was accompanied by his daughter Mrs Buckman, who had been visiting here.

Graminia team did not play here on Sunday, as their pitcher had not recovered from the injury he received in a game June 14.

On Friday last, June 19, a wedding service was celebrated at Peace Lutheran church at Spruce Grove when Miss Katherine Singer, the daughter of Mr and Mrs J. M. Singer, became the bride of Mr Arvon Carawell, Jasper, Alta. Rev H Kuring, the pastor, performed the ceremony. Miss Frida Singer, sister to the bride, was bridesmaid.

The Misses Irene and Mildred Ries, who won a prize in a recent radio broadcast were "on the air" again last Thursday evening, over station CJCA, Edmonton.

A drawing for 2 auto rugs takes place on Saturday Eve. The proceeds go to the ball team.

A supper was served at the Spruce Grove United church on Thurs. Evg., June 18. The meal was served by the men of the congregation. Following the supper, a very interesting lantern slide lecture was given by Mr E A Corbett, of the Dept. of Extension, University of Alberta. Mr. P. G. Thomson, K.C., Edmonton, was present.

For a big meal or a good lunch, try Jack Nichols, at the Hotel Restaurant.

## Keen on Getting Names Down

Census takers in the North are lucky to have hit a dry spell and have made good progress. Many amusing incidents are told of the foreign settlers. They all seem keen on getting their names down, as they fully believe Aberhart is getting the information so he can send them their \$25 a month. The tall boys are all over 21 and entitled to the dividend, yes? Athabasca Echo.

Drive carefully on wet pavements

12 months guarantee against defects and road hazards

You'll feel safer on slippery pavements if your tires have the famous road-gripping All-Weather tread with traction in the centre! Come in and let us put new, safe Goodyears on your car. Prices are surprisingly low.
